

Notes: Cardiovascular disease in pregnancy

Low risk of mortality (<1%)

- ASD
- VSD
- PDA
- Corrected Fallot's tetralogy
- Pulmonary/tricuspid valve disease
- Bioprosthetic valves
- Mitral stenosis NYHA class I and II

Moderate risk (mortality 5 – 10%)

- Mitral stenosis NYHA class III and IV
- Mitral stenosis with AF
- Aortic stenosis
- Artificial valves
- Uncomplicated coarctation of aorta
- Previous MI

Major risk (mortality 25 – 50%)

- Eisenmenger's syndrome
- primary or secondary pulmonary hypertension
- Complicated coarctation of aorta
- Marfan's syndrome with aortic root dilatation
